SUMMARY

Recent Computer Science graduate and Java Full Stack Developer with knowledge of Java, Spring Boot, and PostgreSQL. Experienced in developing scalable web applications, REST APIs, and database-driven solutions. Built projects with features like predictive pricing and semantic search for rental applications. Skilled in writing clean, efficient code and improving application performance. Passionate about software development and eager to contribute to innovative projects.

SKILLS

Java & Backend Development: Core Java, Spring Boot, Maven, Hibernate/JPA

Cloud & DevOps: Git, GitHub

Frontend & Web Technologies: HTML, CSS, JavaScript (ES6+)

Databases & Querying: MySQL, PostgreSQL

Development Tools & Practices: VS Code, Eclipse, IntelliJ IDEA

WORK EXPERIENCE

QSpiders

Bhubaneswar, Odisha

Java Full Stack Developer Trainee

Oct 2025 - Present

- Developing end-to-end web applications using Java and Spring Boot to ensure robust backend functionality and scalability.
- Designing responsive user interfaces with HTML, CSS, and JavaScript for enhanced user engagement and accessibility.
- Implementing database schemas and complex queries in MySQL and PostgreSQL for efficient data persistence and retrieval.
- Executing unit testing and debugging procedures to ensure high-quality, production-ready code delivery.

PROJECTS

Enhancing Rental Web Applications with Machine Learning & NLP

- Integrating advanced Natural Language Processing (NLP) to analyze user reviews and automate sentiment-based property ranking.
- Implementing Machine Learning models to provide Predictive Pricing based on market trends, location, and property features.
- Developing a smart search interface that understands semantic queries to improve the accuracy of rental property matching.

Smart Platform Allocation System

- Engineering a dynamic resource allocation system using Spring Boot to optimize platform assignments in real-time.
- Implementing backend logic to reduce operational delays and maximize resource effectiveness through data-driven decisions.
- Designing a structured database schema in PostgreSQL to handle high-frequency data updates and retrieval.

Smart Library Portal

- Developing a web-based management system to digitize book records, user profiles, and issue/return workflows.
- Integrating basic Recommendation Algorithms to suggest books to users based on historical borrowing patterns.
- Designing an efficient search functionality using SQL to improve the speed of resource discovery for users.

EDUCATION

Siksha 'O' Anusandhan (ITER)

Bhubaneswar

Bachelor of Computer Science

2021 - 2025

- Aggregate: 77.7%

Shakti Higher Secondary School

Class XII

2019 - 2021

- Aggregate: 69.33%

Motto Nodal High School

Class X

2019

- Aggregate: 61.33%

CERTIFICATIONS:-- Java Full Stack Development: Professional training at QSpiders covering Frontend, Backend.
