

Saswat Pattnaik

+91 93379 39116 | saswatpattnaik3344@gmail.com | Software Engineer | Python Backend Developer

PROFESSIONAL SUMMARY

Software Engineer specializing in Java and Python backend development and cloud-native applications, with experience in building scalable enterprise systems using Spring Boot and REST APIs. Skilled in full SDLC, Agile methodologies, and AWS cloud platforms. Proven ability to deliver high-performance, secure, and client-focused solutions with strong emphasis on code quality, testing, and continuous delivery.

TECHNICAL SKILLS

Programming Languages: Python, C#, Java, SQL
Web Technologies: HTML, CSS
Frameworks & Technologies: Spring Boot, Hibernate, REST APIs, Microservices Architecture
Cloud & DevOps: AWS (EC2, S3, Lambda, IAM, DynamoDB), Docker, Kubernetes, CI/CD Pipelines, Git
Cloud Concepts: Distributed Systems, High Availability, Scalability, Reliability Engineering, Cloud Security
Databases: MySQL, PostgreSQL, DynamoDB
Testing & Tools: JUnit, Mockito, Postman, JIRA
Development Tools: IntelliJ IDEA, Eclipse, VS Code
Core Concepts: OOP, Design Patterns, Data Structures & Algorithms, SDLC, Agile/Scrum
Additional Skills: Linux, Windows, Bash/Shell Scripting, YAML, Machine Learning Lifecycle

EDUCATION

Siksha 'O' Anusandhan University (ITER) <i>Bachelor of Technology in Computer Science & Engineering — CGPA: 9.11/10.0</i>	Bhubaneswar, India November 2021 – May 2025
D.A.V. Public School, Pokhariput <i>Higher Secondary (12th - PCM): 91% — Secondary (10th): 90%</i>	Bhubaneswar, India August 2006 – August 2021

PROFESSIONAL EXPERIENCE

Junior Software Engineer Intern <i>EPAM Systems India Pvt. Ltd.</i>	September 2024 – June 2025 Hyderabad, India
- Designed and deployed scalable microservices using Java and Spring Boot based on business requirements, ensuring high availability and performance. - Engineered secure RESTful APIs for reservations, orders, and feedback modules, improving response time by 30% through optimized database queries and modular architecture - Implemented input validation and role-based access controls to enhance API security and data integrity - Developed comprehensive unit and integration testing framework with JUnit 5 and Mockito, achieving 85%+ code coverage and reducing production bugs by 40% - Containerized services using Docker and integrated CI/CD pipelines, reducing deployment time from 2 hours to 15 minutes - Collaborated with cross-functional teams, stakeholders, and clients to deliver solutions aligned with business requirements and Agile delivery cycles. - Participated in code reviews, debugging, and issue resolution, improving overall code quality and system reliability - Supported production systems by identifying and resolving issues, ensuring system stability and performance.	

TECHNICAL PROJECTS

Decentralized Voting System (Blockchain-Based) <i>Python, Cryptographic Hashing</i>	2025
- Developed a Python-based backend system implementing object-oriented programming, data integrity, and scalable architecture for secure voting applications - Designed an append-only distributed ledger mechanism to prevent vote tampering and double voting, reinforcing data integrity and trust. - Implemented validation and secure transaction handling mechanisms, strengthening understanding of distributed systems, consensus logic, and secure system architecture.	
PDF Plagiarism Detector <i>Python, OOP, PDF Libraries</i>	2024
- Built a Python-based data processing system for text analysis and similarity detection, improving efficiency and scalability - Optimized content similarity algorithms, improving file-processing performance by 45% - Designed efficient data processing pipelines to handle large PDF datasets	

ACHIEVEMENTS & CERTIFICATIONS

Achievements: Recognized as top performer during EPAM internship — Java 4-Star & Python 4-Star Badge (HackerRank) — Solved 150+ DSA problems across LeetCode and Coding Ninjas, strengthening problem-solving and algorithmic thinking for real-world applications

Certifications: AWS Academy Graduate - Cloud Foundations — AWS Knowledge - Serverless — Cybersecurity Fundamentals (IBM SkillsBuild) — Cybersecurity Course (Google) — Introduction to Ethical Hacking (Great Learning) — HackerRank Certificates: Java (Basic), Python (Basic) — Basics of ML (Coding Ninjas)
