SUMMARY

Computer Science Engineering student with hands-on experience in software development using Java, Python, Spring Boot, and web technologies like HTML, CSS, and JavaScript. Strong team player with leadership experience in organizing technical seminars and events. Quick learner with a passion for solving real-world problems through technology and eager to contribute to dynamic and innovative projects.

EDUCATION AND TRAINING

Institute of Technical Education and Research, Bhubaneswar, 2025

Bachelor of Technology in Computer Science and Engineering

CGPA: 7.94

Roland Higher Secondary School, Brahmapur, 2021

12th: 60.6%

St. Xavier's High School, Brahmapur, 2019

10th: 62.16%

PROJECTS

Bank Management System: Designed and implemented a comprehensive bank management system in Python to automate a wide range of banking processes. This application streamlines customer account management, financial transactions, and other essential banking operations.

To-Do-List: Develop a basic to-do list where users can add, delete, and mark tasks as complete. Key Features: Adding tasks, deleting tasks, marking tasks as complete. Technologies: HTML for structure, CSS for layout, JavaScript for functionality.

Simple Client-Server Application: Develop a basic client-server application where clients can connect to a server over TCP/IP sockets. Implement features like message exchange, file transfer, or simple commands.

ID Card Generator: Developed a Spring Boot-based web application that automates the generation of employee ID cards using RESTful APIs and a modular architecture with controller, service, and repository layers. Integrated MySQL for data persistence and packaged the application with Maven into an executable JAR for easy deployment.

AI-Powered Career Guidance System: Developed a fully autonomous career guidance system that predicts both traditional and non-traditional career paths using machine learning models and fuzzy logic. Built with Next.js and Python backend integrating predictive ML, generative AI, and real-time labor market insights. Conducted comparative analysis on multiple datasets and models to ensure high accuracy and personalization. Enhanced user experience with dynamic recommendations and skill-gap analysis tools.

SKILLS

- **Programming Languages:** Java, C, Python
- **Web Development Technologies:** Javascript, HTML, CSS
- **Databases:** SQL, PostgreSQL

CERTIFICATIONS

- **Microsoft Learn AI Skills Challenge by Microsoft**
- **Cloud Foundations by AWS**
- **Cloud Practitioner by AWS**

SEMINARS

- Attended Session of LTI Mindtree.
- BRIDGE Campus Learning Series by Deloitte.
- Attended Session of KPIT.
- Attended Session of VOLVO.

SPECIAL SKILLS

- Teamwork
- Communication
- Attentive & Active
- Detail Oriented
- Time Management
